Pages Number: 0 Publisher: China Electric Power Press Pub. Date :2009-09-01. Carbon fiber composite core soft aluminum wire (referred to as carbon fiber wire) is a new synthetic composite core wire. high strength. low line losses. high conductivity. small sag. allowing the temperature is high. carrying capacity. light weight. corrosion resistance and long life. even in the wire carrying capacity increases. the wire temperature rises after the wire is still safe and reliable operation. in order to achieve a power transmission of energy saving. environmental protection and security. This book is divided into four chapters. describes the technical requirements for carbon fiber wire. test and inspection. transport and storage and other technical conditions. carbon fiber wire performance requirements. design analysis. engineering design capacity increase. selection requirements and technical specification and other design techniques. carbon fiber gold wire with the technical conditions. construction and installation. construction and acceptance testing requirements for construction and construction technology. carbon fiber wire sag characteristics. load and temperature relationship in time to ask. high temperature operation. running under the sudden changes in temperature. suspension clamps internal temperature. running state of aluminum and aluminum layer off shares after the stock-carrying capacity Repairing damage to the operation and maintenance and other aspects of technology. content covering the carbon fiber cable design. construction. operation and maintenance aspects of technology. a large number of reference books technical information. combined with the latest research done by test results. the application of carbon fiber wire and provide technical support. Book for electrical engineers and technicians carry out routine design. construction. operation. maintenance. testing. management and other technical reference books. Four Satisfaction guaranteed, or money back.
