Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1916 Excerpt: .doubting the necessity for efficient school medical inspection, and more particularly, the establishment of eye clinics in the public school system, will find much food for thought in the report of the Bureau of Child Hygiene covering school medical inspection in New York City during 1919. This report, prepared by the Director, Dr. S. Josephine Baker, and the Assistant Director, Dr. Jacob Sobel, may be found in the September issue of the Monthly Bulletin of the Department of Health, New York City. Contagious eye and skin diseases are grouped under one heading, showing 237,437 cases; of these, 1,675 are cases of trachoma, 12,457 cases of acute conjunctivitis, and 128 cases of follicular conjunctivitis. Of 248,978 children examined, 17,895 were found to be suffering from defects in vision, of which 8,787 were corrected by proper refraction and glasses. The report goes on to state: The Blind and...

Totally one of the better pdf I have at any time read through. It really is simplified but shocks within the 50 % from the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.
